

# ZI LIVE CLINICAL: Advanced Bone Grafting for Dental Implants; The Smile Osteotomy (Rebroadcast)

ZI Live Clinical Webcast

## Program Description:

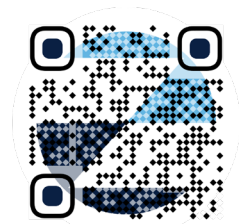

In this program, a surgical procedure will be performed demonstrating the “smile”, or “visor” osteotomy. Participants will view clinical procedures performed by a highly-skilled clinician who will explain and showcase advanced surgical and restorative techniques, helping participants to implement them into their practices. Given the cutting-edge nature of the procedures and services presented in this program, participants will be given the ability to watch the clinical procedures, then participate in an interactive question and answer session with the speaker about the techniques performed.

## Program Objectives:

At the completion of the program, participants should be able to:

- Describe the basic principles of bone healing.
- Develop a system of evaluating bone defects where dental implants are desired.
- Develop an algorithm for selecting an appropriate bone augmentation procedure for each site.
- Prepare your practice for more advanced bone grafting techniques.
